

A great selection of refrigerants - and everything for refrigeration

Darment is the partner
of refrigeration
professionals

The partner of professionals

The importance of and need for refrigeration equipment is constantly growing. Today, refrigeration equipment is needed to produce both cold and heat, and the amount of equipment is growing rapidly. The construction, repair and maintenance of a refrigeration plant are essential activities. The load on the environment can be influenced through equipment and refrigerant choices. With good planning, the greatest environmental actions are taken and the risks are minimised.

Darment takes care of the cold

Darment is a refrigeration wholesaler operating in Helsinki. We offer first-class refrigeration products for the needs of the maintenance, contracting and manufacturing industries. Our goal is to offer everything a refrigeration professional needs in their work with low prices and quick deliveries. We closely follow the changes in the industry and the ever-tightening regulations. We try to anticipate future changes on behalf of our customers. We guide our customers to make the best choices.

Responsibly

It is important to act responsibly in a field that can have a great impact on the environment. Darment has the appropriate permits issued by the authority for the handling and storage of refrigerants. We make sure that those refrigerants that burden the environment do not get into the environment. We also guide our customers to act in a responsible manner.

Fast deliveries and affordable prices

It is important for us to keep the prices of refrigeration products at an affordable level for the customer. We have invested in fast delivery times and always strive to deliver orders as quickly as possible so that the waiting time at the site is as short as possible.

Our experts are here to help

We are experienced in the refrigeration industry, but we have the agility and flexibility of a growing company. Our experts will advise you on difficult issues. With Darment, finding a durable and high-quality refrigeration solution is quick and easy.

A great selection of refrigerants

The refrigerants necessary for the operation of a refrigeration plant are valuable but dangerous to the environment if handled incorrectly. The handling of refrigerants is subject to a permit. Darment has a wide range of refrigerants immediately available from stock. We ensure the quality of refrigerants and examine all the batches of refrigerants that we receive.

All refrigerants are tested

Our laboratory tests each batch of refrigerant for impurities and imbalances. Our customers can be sure that the refrigerant is effective.

Over 50 refrigerants are available immediately

Darment has a wide range of refrigerants in stock for different applications. Our experts will advise you on choosing the most suitable refrigerant.

Everything for refrigeration

High-quality parts and reliable installation work ensure a good refrigeration plant. Darment offers high-quality components for the construction and maintenance of a refrigeration plant as well as the tools with which the installation is done correctly and safely.

Quality products quickly and affordably

We strive to prepare for the future and anticipate our customers' needs. We also have a diverse selection of spare parts for the maintenance and repair of refrigeration equipment. We keep the prices low and deliver orders quickly.

6,000 products for refrigeration professionals

Our comprehensive selection includes high-quality and reliable products from well-known manufacturers. We give products a 12-month warranty when they are used at new sites.
